

Use less energy.

Save more money.

The **Conservation Incentive Program Savings Card** can help customers in our Western New York service area save money and energy when purchasing energy-efficient products and services from select retailers.

Simply present the Savings Card to one of our participating Energy Partners to receive discounts on energy-related items.

Directions: Cut out the above card and fold in the middle.

Don't forget, rebates from the Conservation Incentive Program can be added to the savings received through participating retailers when you replace space and water heating equipment with qualifying, energy-efficient natural gas models.

For even more savings, we also encourage you to check with your local natural gas equipment dealer or contractor to obtain information on the latest manufacturers' rebates and receive details on available federal tax credits.
